Class:	CV
Name:	Frank Yournet
Project:	Project 7
Project Name:	Object Skeleton via thinning
Language:	Java
Due Date:	11/15/2024 before 12:00AM
Submit Date:	11/15/2024 before 12:00AM

Top Level algorithm steps

****
IV. main (...)
****

Step 0: inFile, outFile1, logFile ← open via args []
numRows, numCols, minVal, maxVal ← read from inFile
outFile1 ← "input image header"

outFile1 ← write numRows, numCols, minVal, maxVal

dynamically allocate all arrays and initialize via constructor.

changeCount ← 0

cycleCount ← 0

Step 1: loadImage (inFile,aryOne)

Step 2: outFile1 ← "In main(), before thinning, changeCount = ; cycleCount =" // print values.

prettyDotPrint (aryOne, outFile1) // using dots.

Step 3: thinning (aryOne, aryTwo, logFile)

Step 4: cycleCount ++

Step 5: ouFile1 ← "In main (), inside iteration; changeCount = ; cycleCount =" // print values.

prettyDotPrint (aryOne, outFile1) // using dots.

Step 6: repeat step 3 to step 5 until changeCount <= 0

Step 7: outFile1 ← "in main (), the final skeleton, changeCount = ; cycleCount =" // print values.

prettyPrint (aryOne, outFile1) // Use blank, no dots.

Step 8: close all files
